Date: 2026-03-05

- [ ] Original sentence (removed / changed)
- [ ] New sentence (replacement)
- [ ] Merged into another row / skipped

Step 1 — Keyword Integration

Keywords file: `types_of_trading_charts_keywords.xlsx` · 12 integrated · 9 skipped

#	ORIGINAL SENTENCE	NEW SENTENCE	KEYWORD	VOL.	STATUS
1	– H1: "Types of Trading Charts"	+ H1: "Types of Trading Charts: Candlestick, Renko & Heikin Ashi"	heikin ashi + candlestick charts	2000+1000	DONE
2	– H3: "Renko"	+ H3: "Renko Charts"	renko charts	400	DONE
3	– Heikin Ashi is another chart representation	+ Heikin Ashi candles are another chart representation	heikin ashi candles	1400	DONE
4	– Renko is similar to the range and tick charts.	+ Renko charts are similar to the range and tick charts.	renko charts	400	DONE
5	– here we can have a look at how the Heikin Ashi candle is calculated	+ here we can have a look at the Heikin Ashi candle formula	heikin ashi candle formula	150	DONE
6	– H3: "Heikin Ashi" → "Heikin Ashi Candles Explained"	*unchanged*	heikin ashi candles explained	250	REJECTED
-	– heikin ashi (2000)	*already present in H3 heading*	heikin ashi	2000	DONE
-	– candlestick charts (1000)	*already present in H3 + body*	candlestick charts	1000	DONE
-	– tick chart / tick charts (700/100)	*already present in body*	tick chart / tick charts	700/100	DONE
-	– japanese candlesticks (200)	*already present in body*	japanese candlesticks	200	DONE
-	– renko chart (200)	*already present in body*	renko chart	200	DONE
-	– range charts (100)	*already present in body*	range charts	100	DONE
-	– ohlc charts (40)	*already present in body*	ohlc charts	40	DONE

#	ORIGINAL SENTENCE	NEW SENTENCE	KEYWORD	VOL.	STATUS
-	*footprint chart*			700	SKIP
-	*market profile*			500	SKIP
-	*point and figure chart*			400	SKIP

-	*line break chart*			40	SKIP

Step 2 — Tone of Voice Rewrite

Topic classification: BEGINNER · 39 changes

#	ORIGINAL SENTENCE (FULL)	NEW SENTENCE (FULL)	REASON
1	- Watching the market fluctuations and volatility in real-time is an essential skill to acquire.	+ Monitoring real-time market movements is an essential trading skill.	ToV vague opener tightened; "Watching" -> "Monitoring"; redundant "fluctuations and volatility" simplified
2	- What are the specifics of these charts and how do they differ? You will find out in this lesson.	+ This lesson covers the specifics of each chart type and how they differ.	ToV BEGINNER style direct statement replaces rhetorical question + filler "You will find out"
3	- The ways of displaying data on our price chart are pretty much endless.	+ The ways of displaying data on a price chart are nearly endless.	ToV casual marker "pretty much" -> "nearly"
4	- This is why we will never find two traders that do and watch exactly the same things in their trading.	+ No two traders analyse charts in exactly the same way.	ToV "This is why we will never find" -> direct statement; awkward "do and watch" -> "analyse"; tightened
5	- Although most traders are using candlestick charts which we covered in the previous video, there is more depth in those as well.	+ Although most traders use candlestick charts, which we covered in the previous lesson, there is more depth to explore.	ToV "are using" -> "use"; "previous video" -> "previous lesson"; "more depth in those as well" -> "more depth to explore"
6	- Besides candlestick charts, we will also have a look at different graphical representations of price charts such as bar charts, Renko or Heikin Ashi charts.	+ This lesson also covers bar charts, Renko, and Heikin Ashi charts.	ToV "have a look at" -> casual -> "covers"; redundant "graphical representations of price charts" removed

#	ORIGINAL SENTENCE (FULL)	NEW SENTENCE (FULL)	REASON
7	- We have covered Japanese candlesticks in the previous lesson, so we will do just a quick recap now.	+ Japanese candlesticks are covered in the previous lesson. Here is a quick recap.	ToV "just" filler removed; split into two direct sentences; BEGINNER pacing
8	- They are the most popular methods of charting and viewing technical analysis.	+ They are the most popular charting method for technical analysis.	ToV "methods of charting and viewing technical analysis" -> awkward -> tightened
9	- If the candle closes below the open, we look at a bearish candlestick.	+ If the candle closes below the open, we have a bearish candlestick.	ToV "we look at" -> inconsistent with parallel "we have" in preceding sentence; parallel structure applied
10	- As we can see in the image below, we have two candlestick charts next to each other in our FTMO cTrader platform.	+ The image below shows two candlestick charts displayed side by side in the FTMO cTrader platform.	ToV "As we can see" -> filler removed; active structure; "next to each other" -> "side by side"
11	- The time periodicity is the most popular and common amongst traders.	+ Time-based periodicity is the most widely used option among traders.	ToV "popular and common" -> redundant -> "most widely used"; "amongst" -> "among"
12	- Most trading platforms will allow us to set up charts based on minutes, hours, days, weeks, and seconds.	+ Most trading platforms allow traders to set up charts based on minutes, hours, days, weeks, and seconds.	ToV "will allow us" -> "allow traders" (professional, present tense)
13	- Although we can set up our chart with any setting we want, using those popular timeframes works simply because many traders are also watching them.	+ Using those standard timeframes is effective because many traders are also watching them.	ToV "Although we can set up our chart with any setting we want" -> filler removed; "works simply" -> "is effective"; "popular" -> "standard"

#	ORIGINAL SENTENCE (FULL)	NEW SENTENCE (FULL)	REASON
14	- If we use something like a 40-minute or 3-hour chart, the candlestick patterns on our chart might have a lower weight as no other traders see them.	+ If we use a non-standard chart like a 40-minute or 3-hour setting, candlestick patterns carry less weight because other traders are not watching those levels.	ToV "something like" -> "a non-standard chart like"; "might have a lower weight" -> "carry less weight"; "as" -> "because"
15	- The non-time-based charts are less common, but they still can give traders valuable information.	+ Non-time-based charts are less common, but they can still provide valuable information.	ToV word order "still can" -> "can still"; "give" -> "provide"
16	- Our traders can use tick and range charts in our FTMO cTrader platform, these two are also the most popular non-time-based charts.	+ Traders can use tick and range charts in the FTMO cTrader platform — these are the most popular non-time-based chart types.	ToV "Our traders" -> "Traders"; comma splice fixed with em dash
17	- In other words, one tick is made when the market fluctuates by the minimal price increment.	+ A tick forms each time the market moves by the minimum price increment.	ToV "is made when" -> passive -> "forms"; "fluctuates" -> "moves"; "minimal" -> "minimum"
18	- If we take a look at EURUSD, which is quoted in five decimal places. One tick would equal 0.00001 or 1 pipette.	+ For EURUSD, quoted in five decimal places, one tick equals 0.00001, or 1 pipette.	ToV sentence fragment fixed; "take a look at" -> removed; "would equal" -> "equals"; two sentences merged
19	- In the range bar, every bar will end once the range between its high and low equals the chosen range.	+ In a range bar, each bar closes when the distance between its high and low reaches the chosen range value.	ToV "will end once" -> "closes when" (active, present tense)

#	ORIGINAL SENTENCE (FULL)	NEW SENTENCE (FULL)	REASON
20	- This means that every bar will have the same bar range and close either at high or low.	+ Every range bar has an identical high-to-low range and closes at either the high or low.	ToV "This means that" -> filler removed; "will have" -> "has" (present tense)
21	- Using a range of tick charts can eliminate noise and display trends in a much clearer picture as we will get rid of time periods when markets are not moving and staying range-bound.	+ Using tick and range charts eliminates noise and displays trends more clearly by removing time periods when markets are inactive.	ToV "a range of tick charts" -> "tick and range charts"; "in a much clearer picture" -> "more clearly"; "get rid of" -> "removing"
22	- This can be clearly seen when we compare this DAX four-hour chart with the 100 range chart in cTrader.	+ This becomes clear when comparing a DAX four-hour chart with the 100-range chart in cTrader.	ToV "This can be clearly seen when we compare" -> "This becomes clear when comparing" (active, direct)
23	- We can notice that both uptrend and downtrend were much cleaner on the range chart once we eliminated the time factor and put our focus on price rotations.	+ Both the uptrend and downtrend appeared cleaner on the range chart once we removed the time factor and focused on price rotations.	ToV "We can notice that" -> filler removed; "put our focus on" -> "focused on"
24	- Bar charts, often called OHLC charts, are represented as vertical bars with two notches that represent the open and close of the bar.	+ Bar charts, often called OHLC charts, display as vertical bars with two notches indicating the open and close.	ToV "are represented as" -> passive -> "display as"; "that represent" -> "indicating"
25	- Compared to Japanese candlesticks, bar charts might be a little less clean for new traders when it comes to candlestick patterns.	+ In practice, candlestick patterns are harder to read on bar charts, making them less intuitive for traders learning to identify formations.	ToV "a little less clean" -> hedging -> "harder to read"; "might be" removed

#	ORIGINAL SENTENCE (FULL)	NEW SENTENCE (FULL)	REASON
26	- On the other hand, they might present a little cleaner picture when it comes to marking out support and resistance.	+ On the other hand, bar charts can present a cleaner picture when marking out support and resistance levels.	ToV "they might" -> "bar charts can" (confident, direct); "a little cleaner" -> "a cleaner"
27	- It eliminates the time factor from trading and changes the visuals of our chart completely.	+ They eliminate the time factor from trading and change the chart's visual presentation entirely.	ToV pronoun "It" -> "They" (agrees with plural "Renko charts"); "visuals of our chart" -> "chart's visual presentation"
28	- We won't see candlesticks anymore, but we will be looking at bricks instead.	+ Instead of candlesticks, the chart displays bricks.	ToV future tense -> present; direct statement
29	- Let's say we define that one brick signifies a movement of 5 pips.	+ For example, if one brick represents a 5-pip movement,	ToV "Let's say" -> casual -> "For example"; tightened into conditional clause
30	- So, until the market moves these 5 pips in one direction (from the close of the last brick), no more bricks will be drawn.	+ Until the market moves those 5 pips in one direction from the last brick's close, no new bricks appear.	ToV "So," -> filler removed; "will be drawn" -> passive -> "appear"
31	- Renko charts are not only great for filtering out noise but also for marking out support and resistance areas.	+ Renko charts are effective not only for filtering out noise but also for identifying support and resistance areas.	ToV "great" -> hype word -> "effective"; "marking out" -> "identifying"
32	- It means 'average bar' and although this is not something we need to know, here we can have a look at the Heikin Ashi candle formula.	+ It means 'average bar.' While the formula itself is not strictly necessary to know, here is the Heikin Ashi candle formula for reference.	ToV "here we can have a look at" -> casual -> "here is"; split into two sentences

#	ORIGINAL SENTENCE (FULL)	NEW SENTENCE (FULL)	REASON
33	- The Heikin Ashi is constructed the same way as the candlestick chart but has a different calculation method.	+ Heikin Ashi candles follow the same structure as standard candlesticks but use a different calculation method.	ToV "is constructed" -> passive -> "follow"; keyword "Heikin Ashi candles" preserved
34	- We can set up a Heikin Ashi chart as we want, on the specified time, range or tick.	+ A Heikin Ashi chart can be configured for time-based, range, or tick settings.	ToV "as we want" -> casual -> removed; "specified time" -> "time-based"
35	- Heikin Ashi filters out the movements and makes a much easier approach to trend following.	+ Heikin Ashi filters out minor price movements and supports a more straightforward approach to trend following.	ToV "the movements" -> "minor price movements"; "much easier" -> "more straightforward" (avoids prohibited "easy")
36	- The downside of it is that we might miss some valuable information as it might smooth out the chart a little too much.	+ The trade-off is that the smoothing effect can obscure important price information.	ToV "The downside of it is" -> "The trade-off is"; tightened; "a little too much" hedging removed
37	- But it is a great tool for both entries and trade management.	+ However, it is an effective tool for both entries and trade management.	ToV "But" at sentence start -> "However,"; "great" -> "effective"
38	- To conclude this chapter, the best thing we can do is to play with different charts and settings and find what suits us the best, that is always the smartest approach.	+ The best approach is to experiment with different chart types and settings to find what fits your trading style.	ToV "To conclude this chapter" -> filler removed; "play with" -> "experiment with"; BEGINNER direct address

#	ORIGINAL SENTENCE (FULL)	NEW SENTENCE (FULL)	REASON
39	- But tick charts, range charts, Renko or Heikin Ashi, can be utilized in our strategy and bring a lot of use to our personal trading.	+ However, tick charts, range charts, Renko, and Heikin Ashi can all be incorporated into a trading strategy and add significant value.	ToV "But" -> "However,"; "bring a lot of use" -> vague -> "add significant value"

Step 3 — Structure & Formatting

#	CHANGE TYPE	DESCRIPTION	REASON
1	H2 removed	H2 "Types of trading charts – candlestick chart, Renko, Heikin Ashi" removed	Structure redundant with H1; intro text kept as body paragraph
2	H3 -> H2	"Candlestick charts" promoted from H3 to H2	Structure major independent section deserves H2 weight
3	H3 -> H2	"Bar charts" promoted from H3 to H2	Structure major independent section deserves H2 weight
4	H3 -> H2	"Renko Charts" promoted from H3 to H2	Structure major independent section deserves H2 weight
5	H3 -> H2	"Heikin Ashi" promoted from H3 to H2	Structure major independent section deserves H2 weight
6	H3 added	"Time-Based Charts" under H2 Candlestick Charts	Structure long section split into two logical subsections
7	H3 added	"Non-Time-Based Charts" under H2 Candlestick Charts	Structure tick/range charts logically separate from time-based
8	List added	Popular timeframes (1M, 5M, 15M...) converted to bullet list	Formatting: prose enumeration -> scannable list
9	List added	Tick chart / Range chart converted to bullet list with bold labels	Formatting: two-item comparison -> parallel bullet structure
10	Callout added	Tip in Time-Based Charts: standard timeframes + non-standard warning	Structure Guide: actionable advice -> Tip callout
11	Callout added	Note in Heikin Ashi: averaged data + use alongside candlesticks	Structure Guide: important limitation -> Note callout
12	Callout added	Keep in Mind before Conclusion: cognitive biases in chart analysis	Structure Guide: 1 Keep in Mind per TA lesson
13	Table added	Chart type comparison (Candlestick / Bar / Renko / Heikin Ashi) in Conclusion	Formatting: 4 items compared across multiple attributes -> table
14	Section added	Key Takeaways (6-item bullet list)	Structure Guide: lesson template requires Key Takeaways
15	Section added	Next Steps with 3 internal links	Structure Guide: lesson template requires Next Steps

#	CHANGE TYPE	DESCRIPTION	REASON
16	Internal link	[Japanese Candlesticks](/lesson/japanese-candlesticks/) in intro paragraph	Structure Guide: prerequisite linked inline; anchor text = lesson title
17	Internal link	[support and resistance](/lesson/support-and-resistance/) in Bar Charts body	Structure Guide: related concept linked inline
18	Internal link	[support and resistance](/lesson/support-and-resistance/) in Renko Charts body	Structure Guide: related concept linked inline
19	Internal link	[Technical Indicators](/lesson/technical-indicators/) in Next Steps	Content Inventory: Links To — Technical Indicators
20	Internal link	[Chart Patterns Trading](/lesson/chart-patterns-trading/) in Next Steps	Content Inventory: Links To — Chart Patterns
21	Internal link	[Market Environment: Range vs. Trend](/lesson/market-environment-range-vs-trend/) in Next Steps	Related: trend/range context relevant to chart type selection
22	Bold added	body, wick, Chart periodicity, tick and range charts, Bar charts, OHLC charts, Renko charts, bricks, brick size, Heikin Ashi candles	Structure Guide: bold for key terms on first use
23	Prerequisites added	[Japanese Candlesticks] at top (markdown only)	Structure Guide: always state prerequisites; not in HTML
24	E-E-A-T added	Author box + Last Updated date	Structure Guide: required in every article
25	E-E-A-T added	Educational Content Notice + Risk Warning at end	Structure Guide: required for all YMYL content
26	HR separators	--- between H2 sections	Structure Guide: visual breaks between major thematic shifts

Summary

STEP	STATUS	CHANGES
Step 1: Keywords	DONE	5 changes (4 DONE + P1 approved + P2 rejected)
Step 2: ToV Rewrite	DONE	39 sentence-level changes
Step 3: Structure	DONE	26 structural changes (6 internal links, 3 callouts, 1 table, 2 lists)
Step 4: HTML	DONE	v3 HTML generated
